

What type of mask should you choose?

Whatcom County
HEALTH
Department

Not all face coverings are created equal. Some masks don't offer good protection for the people around you.
Use the best type that is available to you.

Your best choice is a mask that fits your face well, and has at least two layers:

Cloth mask

Face mask

Loose fitting or single layer masks offer less protection for those around you:

Bandana

Neck gaiter

N95 masks should be saved for healthcare workers:

N95 mask

Vented masks allow droplets to be released and do not offer good protection for those around you:

Vented mask

Wearing your mask correctly protects you and those around you

Whatcom County
HEALTH
Department

- Your mask should cover your nose and mouth and fit securely under your chin
- Your mask should fit snugly against your face

Do NOT wear a mask:
